PROFILE

Fullstack software developer who has been building production web applications since 2021, from database design to deployment. Co-founder and CTO of Horent, a CAC-registered property rental platform. Experienced in translating business requirements into maintainable PHP, JavaScript and TypeScript applications, and currently expanding into Next.js, React Native, ASP.NET Core and AI API integration. Open to relocation within Nigeria.

TECHNICAL SKILLS

Languages	PHP, JavaScript (ES6+), TypeScript, C#, SQL, HTML5, CSS3
Frontend	React, Next.js, Tailwind CSS, responsive design, Progressive Web Apps (PWA)
Backend	PHP (OOP, MVC), Laravel, Node.js, Express, ASP.NET Core, RESTful APIs
Mobile	React Native (Expo), Expo Router, TypeScript
Databases	MySQL, PostgreSQL, MongoDB, Supabase — schema design, query optimisation
AI & automation	OpenAI API integration, n8n workflow automation
Tools & deployment	Git & GitHub, Postman, Swagger, Vercel, cPanel, Cloudinary, Google Maps API, WhatsApp API
Practices	MVC architecture, OOP, SEO, performance optimisation, technical documentation, Agile

WORK EXPERIENCE

Co-Founder & CTO — Horent

2024 – Present

Kano, Nigeria · horent.com.ng

- Architected and built a CAC-registered property rental platform from scratch: live listings, user authentication, search and filtering, Google Maps integration and WhatsApp connectivity.
- Moved the product from student housing into the short-stay market, onboarding 10–20 active clients.
- Shipped PWA support so the platform installs on iOS and Android from the browser.
- Currently building the Horent React Native mobile app with Expo, TypeScript and a Supabase backend.
- Lead technical direction as CTO, including backend developer recruitment and equity agreements.

Fullstack / PHP Developer — Independent (DevAbbas)

2021 – Present

Remote · Kano, Nigeria · devabbas.com.ng

- Build and deploy production web applications and websites for startups and businesses across real estate, beauty, education, events and energy, managing each project from database design to deployment.
- Work directly with clients to gather requirements, communicate progress and deliver production-ready applications.
- Write clean, maintainable object-oriented code following MVC patterns.
- Integrate third-party services including Google Maps, Cloudinary and WhatsApp, and build REST endpoints connecting frontend and backend.
- Deploy with cPanel, Vercel and GitHub, configuring domains, SSL and production environments.

Fullstack Developer — BaytulQuran

2024 – Present

Remote

- Built a Quran learning media platform with audio recitations, Tafsir content, video streaming and user authentication for a global audience.
- Implemented file uploads, content management and an admin CMS panel.

WordPress Developer Intern

July 2026 – Present

Remote · Internship

- Review live WordPress/Elementor client projects and provide structured technical feedback.
- Join client delivery calls and support QA on a 10-day corporate WordPress build for an energy-sector client.

UI/UX Designer Intern

July 2026 – Present

Remote · 4-month internship

- Design wireframes and UI screens for digital media clients in Figma and Canva, and brand-consistent visual assets for web and social.

SELECTED PROJECTS

Horent — horent.com.ng

- Property rental platform for students and professionals in Kano: Google Maps, amenity filters, paginated listings, authentication, WhatsApp enquiries and PWA install.

Tech: PHP, MySQL, JavaScript, React, Google Maps API, WhatsApp API, PWA, React Native (Expo), Supabase

HairsByOlive — hairsbyolive.ng

- Full-stack e-commerce platform for a beauty brand: product management, real-time discount pricing, cart, custom order flow, authentication and an admin dashboard for inventory and orders. Cloudinary image optimisation for fast mobile loading.

Tech: PHP, MySQL, JavaScript, Cloudinary, Bootstrap

Wallermen — wallermen.com
